MSE 2103 topics

- The disadvantage of astronomy: uberlarge distances
- Emerging patterns: stars follow rules, laws – *universalities*
- How old is the Universe? Consistency above all!
- Ages in a nutshell:
 - meteorites – 4.56 billion years
 - oldest white dwarfs – 12.7 billion years
 - oldest globular clusters – 13.4 billion years
 - expansion of the Universe – 13.5 billion years
 - maps of the Big Bang – 13.7 billion years
- Aristotle's Eternity from dynamical perfection; *telos*
- Eternity might not be that long after all: Biblical Chronology
- Rabbi Halafta's *Anno mundi*:
 - AM 0: God made Adam
 - AM 1656: Noah's arc
 - AM 2448: Exodus
 - AM 5778: today
- Julius Africanus' *Anno Adam*:
 - AA 0: God made Adam
 - AA 2262: Noah's Arc
 - AA 3707: Exodus
 - AA 7519: today

Bishop Eusebius' *Chronicle*:

- AA 0: God made Adam
- AA 2262: Noah's Arc
- AA 3689: Exodus
- AA 7501: today

- Reverend John Lightfoot, 1642, Bishop Ussher, 1650:
 - 9AM on Sunday, Oct 23 4004 BC: Man was created
 - sunset on Saturday, Oct 22 4004 BC: Genesis
- Astronomers corroborate: 3993BC (Kepler), 3998BC (Newton)
- So what version/translation of the Bible is correct?
- Unanswerable questions:
 - Was Adam the *first* man?
 - Did Earth exist prior to Creation?
 - How to reconcile Biblical Chronography with other tests?
- Hutton's paradigm
- Can science and religion co-exist peacefully?
