MSE 2103 topics

- Test review; midterm grade review
- The mass-luminosity relationship revisited
- Computing principal stellar parameters across the H-R diagram
 - given the temperature, what is the luminosity of a MS star?
 - given the luminosity, what is the mass of a MS star?
 - given the luminosity, what is the absolute magnitude?
 - given the luminosity and temperature, what is the radius of a main sequence star?
 - given the absolute and apparent magnitude, what is the distance to the star?

Luminosity: _____

Mass-Luminosity: _____

Apparent magnitude: _____

Absolute magnitude: _____

Distance modulus: _____

(and, of course, understanding the H-R diagram...)
